

Shot plugs™ custom molded hearing protection

SHOT PLUGS

Our Precision series hearing protection products are made with the highest quality medical grade materials and are packed with exclusive features only available in our products. The shot beads help absorb the vibration of high level noises such as fireworks and gunshots. The beads are encased in a hard acrylic shell that can be clear or any other solid color, and have a soft comfort tip for the canal. Ideal sound protection for shooting ranges, fireworks etc.

- 26+ NRR Average Attenuation 38+dB.
- Shot Filled High-Mass™ Design for Increased Impulse and Low Frequency Noise Attenuation
- Exclusive Molded Comfort Canal Tip
- Best Solution for Highest Protection and Comfort
- Hard or Soft Material (Soft Standard)
- Custom Colors Available (Frosted Clear is Standard)
- Glitter Colors (optional)*
- Available With Optional HD Retention Cord (optional)*

*Additional charges may apply
